Private companies are a massive opportunity

Public company opportunity is shrinking:

- 46,583 public companies
- Half as many compared to 10 years ago in the US

Private company opportunity is growing:

- Millions of private companies
- Over 200k new companies each year in the US
- \$3T in funding and many times that in revenue
- 124M employees in the US

Millions of professionals desperately search for those opportunities

An iceberg floating in a blue ocean. The tip of the iceberg, which is visible above the water, is labeled 'Private company opportunities'. The much larger, submerged part of the iceberg is labeled with a list of professions: 'Sales People', 'Business Development', 'Marketers', 'Entrepreneurs', 'Investors', 'Consultants', and 'Job Seekers'. This visual metaphor suggests that the opportunities sought by these professionals are scarce and hidden, like the tip of an iceberg.

**Sales People
Business Development
Marketers
Entrepreneurs
Investors
Consultants
Job Seekers**

**Private company
opportunities**

Prospecting for those opportunities is slow and frustrating

Private company data

- Opaque
- Unstructured
- Unreliable
- Quickly out of date
- Expensive
- Not a graph
- Not easily monitored

Existing solutions

- Typically focus on productivity
- Track progress - not fill pipeline
- Built on top of empty databases
- Rely on you to provide the prospects
- Go stale after import of data
- Don't track buy signals
- Don't suggest new prospects

Crunchbase unlocks those opportunities by offering a world class prospecting tool on top of our proprietary data platform

Our data is structured, intelligent, and dynamic.

Our unique dataset drives our growth flywheel

And it's paying off: we make money quickly and efficiently

Over xxk professionals pay us for prospecting tools

multi-join dynamic searches

customizable columns, sorting and email alerts

statistics and analysis

The screenshot displays the Crunchbase Pro web application. On the left is a navigation sidebar with links to Overview, Companies, Funding Rounds, Acquisitions, Subsets, Events, My Searches, My Lists, Favorites, Connections, and Data Export. The main content area is titled 'Companies' and shows a search interface with various filters like 'Geography', 'Industry', and 'Funding Type'. A search button is visible. Below the search filters, a table of results is shown with columns for Name, Category, Headquarters Location, and a link to the company profile. The table is currently empty, showing only the column headers. To the right of the main interface, there are two panels. The first panel, titled 'Health Care companies founded in the last 3 years', shows a table with columns for Type, Date, and Weekly. The second panel, titled 'Total Funding Amount', shows a summary of funding statistics for the selected companies.

Type	Date	Weekly
Acquisitions		
Acquisitions		
Funding Rounds		
Acquisitions		
Funding Rounds		

Total Funding Amount

Category	Amount
Total	\$3,495,564,154
Sub	\$2,179
Sub	\$347,000,000
Average	\$7,945,379
Median	\$1,877,590

This is a proven model that works
